### 1 Identification

· Product identifier

· Trade name: <u>ALT Finish 288</u> · Article number: 123-xxx-005U

· Application of the substance / the mixture Sealing

Details of the supplier of the safety data sheet

· Manufacturer/Supplier:

ALT Global, LLC 12 Dwight Place Fairfield, NJ 07004

USA

Tel.: +1 973-287-6158 Fax: +1 973-287-6168 Internet: www.altglobal.com

· Information department:

Division product safety

DOMESTIC NORTH AMERICA 800-424-9300

# 2 Hazard(s) identification

· Classification of the substance or mixture

GHS02 Flame

Flam. Liq. 2 H225 Highly flammable liquid and vapor.

Skin Irrit. 2 H315 Causes skin irritation.

Skin Sens. 1 H317 May cause an allergic skin reaction. STOT SE 3 H335 May cause respiratory irritation.

- · Label elements
- · GHS label elements

The product is classified and labeled according to the Globally Harmonized System (GHS).

· Hazard pictograms

GHS02 GHS07

· Signal word Danger

Printing date 02/16/2021 Reviewed on 05/31/2020

Trade name: ALT Finish 288

(Contd. of page 1)

· Hazard-determining components of labeling:

methyl methacrylate

2-ethylhexyl acrylate

Hazard statements

H225 Highly flammable liquid and vapor.

H315 Causes skin irritation.

H317 May cause an allergic skin reaction.

H335 May cause respiratory irritation.

· Precautionary statements

P210 Keep away from heat/sparks/open flames/hot surfaces. - No smoking.

P261 Avoid breathing vapours.

P280 Wear protective gloves/ eye protection.

P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with

water or shower.

P312 Call a poison center/doctor if you feel unwell. P403+P235 Store in a well-ventilated place. Keep cool.

· Classification system:

NFPA ratings (scale 0 - 4)

Health = 2 Fire = 3 Reactivity = 2

· HMIS-ratings (scale 0 - 4)

Health = 2 Fire = 3 Reactivity = 2

· Other hazards

- · Results of PBT and vPvB assessment
- · PBT: Does not meet the PBT-criteria of Annex XIII of REACH (self assessment).
- · vPvB: Does not meet the vPvB-criteria of Annex XIII of REACH (self assessment).

# 3 Composition/information on ingredients

· Chemical characterization: Mixtures

· **Description**: Mixture of the substances listed below with nonhazardous additions.

| · Dangerous components:                     |                       |         |
|---|-----------------------|---------|
| CAS: 80-62-6<br>Index number: 607-035-00-6  | methyl methacrylate   | 25-50%  |
| CAS: 103-11-7<br>Index number: 607-107-00-7 | 2-ethylhexyl acrylate | 10-25%  |
| CAS: 13463-67-7                             | titanium dioxide      | 2.5-10% |

# 4 First-aid measures

- Description of first aid measures
- · General information:

Immediately remove any clothing soiled by the product.

Take affected persons out of danger area and lay down.

Involve doctor immediately.

· After inhalation:

In case of unconsciousness place patient stably in side position for transportation.

(Contd. on page 3)

Printing date 02/16/2021 Reviewed on 05/31/2020

Trade name: ALT Finish 288

(Contd. of page 2)

Take affected persons into fresh air and keep quiet.

Seek medical treatment.

· After skin contact:

Immediately wash with water and soap and rinse thoroughly.

If skin irritation continues, consult a doctor.

- · After eye contact: Rinse opened eye for several minutes under running water. Then consult a doctor.
- · After swallowing: Do not induce vomiting; immediately call for medical help.
- Information for doctor:
- · Most important symptoms and effects, both acute and delayed

. Headache

Dizziness

Skin sensitization.

Irritant to skin, eyes and respiratory system.

Indication of any immediate medical attention and special treatment needed

After inhalation, even in the absence of signs of disease, inhaled corticosteroid (eg Ventolair) give.

# 5 Fire-fighting measures

- Extinguishing media
- · Suitable extinguishing agents: CO<sub>2</sub>, sand, extinguishing powder, foam.
- · For safety reasons unsuitable extinguishing agents: Water with full jet
- Special hazards arising from the substance or mixture

Can form explosive gas-air mixtures.

Formation of toxic gases is possible during heating or in case of fire.

In case of fire, the following can be released:

Carbon monoxide (CO)

Nitrogen oxides (NOx)

Vapours are heavier than air.

Crawling vapors can result in greater distance from the ignition!

- Advice for firefighters
- Protective equipment:

Wear fully protective suit.

Wear self-contained respiratory protective device.

· Additional information

Cool endangered receptacles with water spray.

Collect contaminated fire fighting water separately. It must not enter the sewage system.

#### 6 Accidental release measures

Personal precautions, protective equipment and emergency procedures
Ensure adequate ventilation

Keep away from ignition sources

Use respiratory protective device against the effects of fumes/dust/aerosol.

Wear protective equipment. Keep unprotected persons away.

· Environmental precautions:

Do not allow to enter sewers/ surface or ground water.

Inform respective authorities in case of seepage into water course or sewage system.

Methods and material for containment and cleaning up:

Do not flush with water or aqueous cleansing agents

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).

(Contd. on page 4)

Printing date 02/16/2021 Reviewed on 05/31/2020

# 7 Handling and storage

#### · Handling:

#### · Precautions for safe handling

Cool down container when heated. Cool containers exposed to heat with water. Emergency cooling must be provided in the event of an ambient fire. Keep container tightly closed to prevent heat build up (pressure increase). Avoid heat.

Do not refill residue into storage receptacles.

at least 7-fold air changes per hour

Prevent formation of aerosols.

#### Information about protection against explosions and fires:

Highly volatile, flammable constituents are released during processing.

Fumes can combine with air to form an explosive mixture.

Only explosion-proof equipment.

- · Conditions for safe storage, including any incompatibilities
- Storage:
- Requirements to be met by storerooms and receptacles:

Store only in the original receptacle.

Store in a cool location.

#### · Information about storage in one common storage facility:

Store away from oxidizing agents.

Store away from foodstuffs.

### Further information about storage conditions:

Store in cool, dry conditions in well sealed receptacles.

Storage in a collecting room is required.

Store under lock and key and with access restricted to technical experts or their assistants only.

max. Storage temperature 30  $^{\circ}$  C

Keep receptacle tightly sealed.

Specific end use(s) Building coating or sealing.

# 8 Exposure controls/personal protection

- · Additional information about design of technical systems: No further data; see item 7.
- · Control parameters
- Components with limit values that require monitoring at the workplace:

The following constituent is the only constituent of the product which has a PEL, TLV or other recommended exposure limit.

At this time, the other constituents have no known exposure limits.

# 80-62-6 methyl methacrylate (25-50%)

PEL Long-term value: 410 mg/m³, 100 ppm REL Long-term value: 410 mg/m³, 100 ppm

TLV Short-term value: 410 mg/m³, 100 ppm

Long-term value: 205 mg/m³, 50 ppm

DSEN

- · Additional information: The lists that were valid during the creation were used as basis.
- Exposure controls
- Personal protective equipment:
- · General protective and hygienic measures:

Avoid contact with the eyes and skin.

Immediately remove all soiled and contaminated clothing.

Wash hands before breaks and at the end of work.

Keep away from foodstuffs, beverages and feed.

Do not inhale gases / fumes / aerosols.

(Contd. on page 6)

Printing date 02/16/2021 Reviewed on 05/31/2020

Trade name: ALT Finish 288

(Contd. of page 5)

#### Breathing equipment:

Ensure good ventilation.

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use respiratory protective device that is independent of circulating air.

· Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

Preventive skin protection by use of skin-protecting agents is recommended.

After use of gloves apply skin-cleaning agents and skin cosmetics.

Check protective gloves prior to each use for their proper condition.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Material of gloves

Butyl rubber gloves - butyl e.g. KCL BUTOJET Recommended thickness of the material: ≥ 0.7 mm Breakthrough time: ≥ 480 min

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

### Penetration time of glove material

Our Recommendation is mainly on a one-time use as a short-term protection Liquid splashes. For other applications, you should contact a glove manufacturer.

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

For the permanent contact in work areas without heightened risk of injury (e.g. Laboratory) gloves made of the following material are suitable:

Butyl rubber, BR

- For the permanent contact gloves made of the following materials are suitable: Butyl rubber, BR
- · Not suitable are gloves made of the following materials: Leather gloves
- · Eye protection:

Tightly sealed goggles

· Body protection:

Protective work clothing

# 9 Physical and chemical properties

- · Information on basic physical and chemical properties
- · General Information
- · Appearance:

Form: Fluid

# 10 Stability and reactivity

- · Reactivity see Section 10.2
- · Possibility of hazardous reactions

Exothermic reaction.

Reacts with peroxides and other radical forming substances.

A hazardous polymerization may occur after the exhaustion of the inhibitor.

- · Conditions to avoid Avoid heat. Avoid direct sunlight.
- · Incompatible materials: Heftige Reaktionen mit Peroxiden und anderen Reduktionsmittel
- · Hazardous decomposition products:

No dangerous decomposition prodocts used accordind to specifications.

- · Primary irritant effect:
- on the skin: Irritant to skin and mucous membranes.
- · on the eye: Irritating effect.
- · Sensitization: Sensitization possible through skin contact.
- Other information (about experimental toxicology):

Due to the high vapor pressure is a harmful concentration in the air quickly been reached. At high concentrations can occur narcotic effect.

- · Subacute to chronic toxicity: not tested
- Additional toxicological information:

The product shows the following dangers according to internally approved calculation methods for preparations:

Irritant

21 days

# 103-11-7 2-ethylhexyl acrylate

other (28d) >1,000 mg/kg (Soil microorganisms) (OECD 217)

The product has not been tested. The statement has been derived from products of a

similar structure or composition.

EC50/48h (static) 1.3 mg/l (daphnia magna) (OECD-Richtline 202)

Part 1

LC50/96h (static) 1.81 mg/l (Rainbow trout) (OECD 203)

NOEC/21d 0.19 mg/l (daphnia magna)

The details of the toxic effect relates to the analytically determined concentration. The product has not been tested. The statement has been derived from products of a

similar structure or composition.

EC50/72h (static) 1.71 mg/l (scenedesmus subspicatus) (OECD 201)

Die Angaben der toxischen Wirkung bezieht sich auf die analytisch ermittelte

Konzentration.

- · Persistence and degradability Easily biodegradable
- · Other information: The product is easily biodegradable.
- Behavior in environmental systems:
- · Bioaccumulative potential May be accumulated in organism
- · Mobility in soil

MMA: A binding to the solid phase of soil, sediment and sewage sludge is not expected. From the water surface the substance is slowly evaporated into the atmosphere. Where the substance into the environment he verleibt preferably in the compartment into which it has emerged.

2-EHA: The product floats on water and does not dissolve. Adsorption on soil is not likely.

- Additional ecological information:
- · CSB-value: 2-EHA: Theoretical oxygen demand (TOD) = 5.6 g/g
- · BSB5-value: 0.14 g/g (MMA)
- · General notes: Water hazard class 1 (Self-assessment): slightly hazardous for water

(Contd. on page 10)

Printing date 02/16/2021 Reviewed on 05/31/2020

(Contd. of page 9)

- · Results of PBT and vPvB assessment
- · **PBT:** Does not meet the PBT-criteria of Annex XIII of REACH (self assessment).
- · **vPvB**: Does not meet the vPvB-criteria of Annex XIII of REACH (self assessment).
- · Other adverse effects No further relevant information available.

# 13 Disposal considerations

· Waste treatment methods

Hazardous waste according to Waste Catalogue (EWC). If recycling is not possible, waste must be in compliance with local regulations to be removed.

· Recommendation:

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

Uncured product residues are special waste.

Cured product residues are not hazardous waste.

- · Uncleaned packagings:
- · Recommendation:

This product (liquid) and its container must be disposed of as hazardous waste.

Disposal must be made according to official regulations.

### 16 Other information

These figures relate to the product as delivered.

Relevant identified uses of the mixture

SU3 Industrial uses: Uses of substances as such or in preparations at industrial sites

SU19 Building and construction work

SU22 Professional uses: Public domain (administration, education, entertainment, services, craftsmen)

Uses advised against

SU21 Consumer uses: Private households / general public / consumers

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

### Training hints

Teaching about hazards and precautions to hand the operating instructions (Technical Rule 555). Instruction must take place before the start of employment and at least annually thereafter.

· Date of preparation / last revision 02/16/2021 / 24
