1 Identification

· Product identifier

- · Trade name: ALT Wetraffic 491 Resin Only
- Article number: 361-xxx-yyyU
- · Application of the substance / the mixture Coating
- Details of the supplier of the safety data sheet • Manufacturer/Supplier:

ALT Global, LLC 12 Dwight Place Fairfield, NJ 07004 USA Tel.: +1 973-287-6158 Fax: +1 973-287-6168 Internet: www.altglobal.com

Information department:

Division product safety Mr. Bonyadlou Tel.: +1 973-287-6158 E-Mail: mbonyadlou@altglobal.com **Emergency telephone number:**

For Chemical Emergency Spill Leak Fire Exposure or Accident Call CHEMTREC Day or Night

DOMESTIC NORTH AMERICA 800-424-9300

2 Hazard(s) identification

· Classification of the substance or mixture

GHS02 Flame

Flam. Liq. 2 H225 Highly flammable liquid and vapor.

Skin Irrit. 2 H315 Causes skin irritation.

Skin Sens. 1 H317 May cause an allergic skin reaction.

STOT SE 3 H335 May cause respiratory irritation.

· Label elements

· GHS label elements

The product is classified and labeled according to the Globally Harmonized System (GHS). • Hazard pictograms

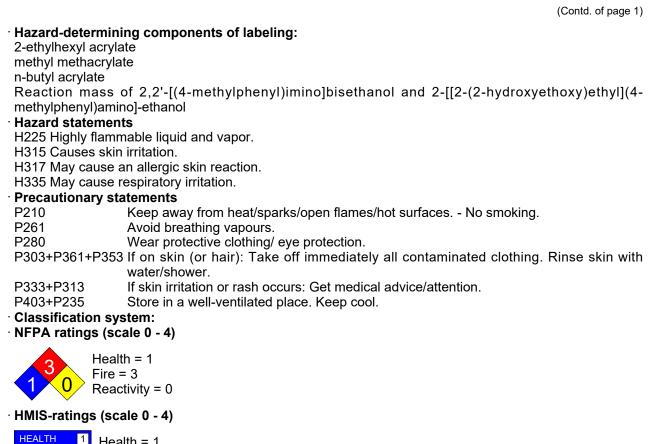

· Signal word Danger

(Contd. on page 2)

Other hazards

Results of PBT and vPvB assessment

· PBT: Does not meet the PBT-criteria of Annex XIII of REACH (self assessment).

· vPvB: Does not meet the vPvB-criteria of Annex XIII of REACH (self assessment).

3 Composition/information on ingredients

· Chemical characterization: Mixtures

· Description: Mixture of the substances listed below with nonhazardous additions.

 Dangerous components: 		
CAS: 103-11-7 Index number: 607-107-00-7	2-ethylhexyl acrylate	10-25%
CAS: 80-62-6 Index number: 607-035-00-6	methyl methacrylate	10-25%
CAS: 141-32-2 Index number: 607-062-00-3	n-butyl acrylate	≥2.5-<10%
	Reaction mass of 2,2'-[(4-methylphenyl)imino]bisethanol and 2-[[2-(2-hydroxyethoxy)ethyl](4-methylphenyl)amino]-ethanol	≥0.1-≤0.5%

4 First-aid measures

· Description of first aid measures

• General information:

Immediately remove any clothing soiled by the product. Take affected persons out of danger area and lay down. Involve doctor immediately.

· After inhalation:

In case of unconsciousness place patient stably in side position for transportation. Take affected persons into fresh air and keep quiet.

Seek medical treatment.

After skin contact:

Immediately wash with water and soap and rinse thoroughly.

If skin irritation continues, consult a doctor.

- After eye contact: Rinse opened eye for several minutes under running water. Then consult a doctor.
- · After swallowing: Do not induce vomiting; immediately call for medical help.
- · Information for doctor:
- Most important symptoms and effects, both acute and delayed Headache Dizziness
- Skin sensitization.

Irritant to skin, eyes and respiratory system.

- Indication of any immediate medical attention and special treatment needed
- After inhalation, even in the absence of signs of disease, inhaled corticosteroid (eg Ventolair) give.

5 Fire-fighting measures

- · Extinguishing media
- Suitable extinguishing agents: CO₂, sand, extinguishing powder, foam.
- · For safety reasons unsuitable extinguishing agents: Water with full jet
- Special hazards arising from the substance or mixture

Can form explosive gas-air mixtures. Formation of toxic gases is possible during heating or in case of fire.

In case of fire, the following can be released:

- Carbon monoxide (CO)
- Nitrogen oxides (NOx)
- Vapours are heavier than air.

Crawling vapors can result in greater distance from the ignition!

- Advice for firefighters
- Protective equipment:
- Wear fully protective suit.
- Wear self-contained respiratory protective device.
- Additional information

Cool endangered receptacles with water spray.

Collect contaminated fire fighting water separately. It must not enter the sewage system.

6 Accidental release measures

• Personal precautions, protective equipment and emergency procedures Ensure adequate ventilation

Keep away from ignition sources

(Contd. of page 3)

Safety Data Sheet acc. to OSHA HCS

Reviewed on 02/03/2022

Use respiratory protective device against the effects of fumes/dust/aerosol. Wear protective equipment. Keep unprotected persons away. **Environmental precautions:** Do not allow to enter sewers/ surface or ground water. Inform respective authorities in case of seepage into water course or sewage system. Methods and material for containment and cleaning up: Do not flush with water or aqueous cleansing agents Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). **Reference to other sections** See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information. 7 Handling and storage

· Handling:

· Precautions for safe handling

Cool down container when heated. Cool containers exposed to heat with water. Emergency cooling must be provided in the event of an ambient fire. Keep container tightly closed to prevent heat build up (pressure increase). Avoid heat.

Do not refill residue into storage receptacles.

Ensure good ventilation/exhaustion at the workplace.

at least 7-fold air changes per hour

Prevent formation of aerosols.

· Information about protection against explosions and fires:

Highly volatile, flammable constituents are released during processing.

Keep ignition sources away - Do not smoke.

Fumes can combine with air to form an explosive mixture.

Only explosion-proof equipment.

Protect against electrostatic charges.

Protect from heat.

- \cdot Conditions for safe storage, including any incompatibilities
- Storage:
- Requirements to be met by storerooms and receptacles:

Store only in the original receptacle. Store in a cool location.

• Information about storage in one common storage facility: Store away from oxidizing agents.

Store away from foodstuffs.

Further information about storage conditions:
 Store in cool, dry conditions in well sealed receptacles.
 max. Storage temperature 30 ° C
 Storage in a collecting room is required.
 Store under lock and key and with access restricted to technical experts or their assistants only.
 Keep receptacle tightly sealed.

Protect from heat and direct sunlight.

Printing date 02/03/2022

Trade name: ALT Wetraffic 491 Resin Only

• **Specific end use(s)** Building coating or sealing.

8 Exposure controls/personal protection

• Additional information about design of technical systems: No further data; see item 7.

· Control parameters

Components with limit values that require monitoring at the workplace:

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit.

At this time, the other constituents have no known exposure limits.

80-6	2-6 methyl methacrylate (10-25%)
PEL	Long-term value: 410 mg/m³, 100 ppm
REL	Long-term value: 410 mg/m³, 100 ppm
TLV	Short-term value: 100 ppm Long-term value: 50 ppm DSEN, A4
141-	32-2 n-butyl acrylate (≥2.5-<10%)
REL	Long-term value: 55 mg/m³, 10 ppm
TLV	Long-term value: 2 ppm DSEN, A4
hhΔ ·	itional information: The lists that were valid during the creation were used as basis

• Additional information: The lists that were valid during the creation were used as basis.

Exposure controls

- Personal protective equipment:
- General protective and hygienic measures:

Avoid contact with the eyes and skin.

Immediately remove all soiled and contaminated clothing.

Wash hands before breaks and at the end of work.

Keep away from foodstuffs, beverages and feed.

Breathing equipment:

Ensure good ventilation.

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use respiratory protective device that is independent of circulating air.

Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

Preventive skin protection by use of skin-protecting agents is recommended.

After use of gloves apply skin-cleaning agents and skin cosmetics.

Check protective gloves prior to each use for their proper condition.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Material of gloves

Butyl rubber gloves - butyl e.g. KCL BUTOJET Recommended thickness of the material: ≥ 0.7 mm Breakthrough time: ≥ 480 min

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be (Contd. on page 7)

checked prior to the application.

- **Penetration time of glove material** Our Recommendation is mainly on a one-time use as a short-term protection Liquid splashes. For other applications, you should contact a glove manufacturer.
- The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.
- For the permanent contact in work areas without heightened risk of injury (e.g. Laboratory) gloves made of the following material are suitable:
- Butyl rubber, BR

Printing date 02/03/2022

- For the permanent contact gloves made of the following materials are suitable: Butyl rubber, BR
- Not suitable are gloves made of the following materials: Leather gloves
- · Eye protection:

Tightly sealed goggles

Body protection:

Protective work clothing

9 Physical and chemical prope	erties
 Information on basic physical and General Information Appearance: Form: Color: Odor: Odor threshold: 	chemical properties Fluid Different according to coloring after MMA Not determined.
· pH-value:	Not determined. Mixture is non-polar/aprotic.
 Change in condition Melting point/Melting range: Boiling point/Boiling range: 	Undetermined. Undetermined.
· Flash point:	14 °C (57.2 °F) (DIN EN ISO 3679:2015-06)
· Flammability (solid, gaseous):	Not applicable.
· Ignition temperature:	252 °C (485.6 °F) (2-EHA)
· Auto igniting:	Product is not selfigniting.
· Danger of explosion:	Product is not explosive. However, formation of explosive air/ vapor mixtures are possible. Not determined.
 Explosion limits: Lower: Upper: 	0.9 Vol % (2-EHA) Not determined. 6.4 Vol % (2-EHA) Not determined.
· Vapor pressure:	Not determined.

10 Stability and reactivity

- · Reactivity see Section 10.2
- · Chemical stability
- · Thermal decomposition / conditions to be avoided:
- No decomposition if used according to specifications.
- Possibility of hazardous reactions
- Exothermic reaction.

Reacts with peroxides and other radical forming substances.

- A hazardous polymerization may occur after the exhaustion of the inhibitor.
- · Conditions to avoid Avoid heat. Avoid direct sunlight.
- · Incompatible materials: Heftige Reaktionen mit Peroxiden und anderen Reduktionsmittel
- Hazardous decomposition products:
- No dangerous decomposition prodocts used accordind to specifications.
- Additional information:

Emergency procedures will vary depending on individual circumstances. The customer should have a contingency plan to the workplace may be present.

Trade name: ALT Wetraffic 491 Resin Only

(Contd. of page 10)

- · Persistence and degradability Easily biodegradable
- Other information: The product is easily biodegradable.
- Behavior in environmental systems:
- · Bioaccumulative potential May be accumulated in organism
- · Mobility in soil

MMA: A binding to the solid phase of soil, sediment and sewage sludge is not expected. From the water surface the substance is slowly evaporated into the atmosphere. Where the substance into the environment he verleibt preferably in the compartment into which it has emerged.

2-EHA: The product floats on water and does not dissolve. Adsorption on soil is not likely.

- · Additional ecological information:
- · CSB-value: 2-EHA: Theoretical oxygen demand (TOD) = 5.6 g/g
- · **BSB5-value:** 0.14 g/g (MMA)
- General notes:

Water hazard class 1 (Self-assessment): slightly hazardous for water

Do not allow product to reach ground water, water course or sewage system.

- Results of PBT and vPvB assessment
- **PBT:** Does not meet the PBT-criteria of Annex XIII of REACH (self assessment).
- · vPvB: Does not meet the vPvB-criteria of Annex XIII of REACH (self assessment).
- Other adverse effects No further relevant information available.

13 Disposal considerations

· Waste treatment methods

Hazardous waste according to Waste Catalogue (EWC). If recycling is not possible, waste must be in compliance with local regulations to be removed.

• Recommendation:

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

Uncured product residues are special waste. Cured product residues are not hazardous waste.

Uncleaned packagings:

Recommendation:

This product (liquid) and its container must be disposed of as hazardous waste. Disposal must be made according to official regulations.
