1 Identification

· Product identifier

- · Trade name: ALT R260 Thixo (low-odor)
- · Article number: 104-732-005U
- · Application of the substance / the mixture Sealing
- · Details of the supplier of the safety data sheet
- · Manufacturer/Supplier:

ALT Global, LLC 12 Dwight Place Fairfield, NJ 07004 USA Tel.: +1 973-287-6158 Fax: +1 973-287-6168 Internet: www.altglobal.com

· Information department:

Division product safety Mr. Bonyadlou Tel.: +1 973-287-6158 E-Mail: mbonyadlou@altglobal.com • Emergency telephone number:

For Chemical Emergency Spill Leak Fire Exposure or Accident Call CHEMTREC Day or Night

DOMESTIC NORTH AMERICA 800-424-9300

2 Hazard(s) identification

· Classification of the substance or mixture

GHS07

Skin Irrit. 2 H315 Causes skin irritation.
Eye Irrit. 2A H319 Causes serious eye irritation.
Skin Sens. 1 H317 May cause an allergic skin reaction.
STOT SE 3 H335 May cause respiratory irritation.

Flam. Liq. 4 H227 Combustible liquid.

· Label elements

· GHS label elements

The product is classified and labeled according to the Globally Harmonized System (GHS).

Hazard pictograms

· Signal word Warning

 Hazard-determining components of labeling: benzyl methacrylate 2-ethylhexyl acrylate methyl methacrylate Reviewed on 04/25/2016

Printing date 10/09/2018

Trade name: ALT R260 Thixo (low-odor)

Reviewed on 04/25/2016

(Contd. of page 1)

· Hazard statements

H227 Combustible liquid.

H315 Causes skin irritation.

H319 Causes serious eye irritation.

H317 May cause an allergic skin reaction.

H335 May cause respiratory irritation.

· Precautionary statements

P210	Keep away from heat/sparks/open flames/hot surfaces No smoking.
P261	Avoid breathing vapours.
P280	Wear protective gloves/ eye protection.
	If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with
	water/shower.
P333+P313	If skin irritation or rash occurs: Get medical advice/attention.

P403+P235 Store in a well-ventilated place. Keep cool.

· Classification system:

· NFPA ratings (scale 0 - 4)

· HMIS-ratings (scale 0 - 4)

HEALTH2Health = 2FIRE3Fire = 3REACTIVITY2Reactivity = 2

· Other hazards

- · Results of PBT and vPvB assessment
- **PBT:** Does not meet the PBT-criteria of Annex XIII of REACH (self assessment).
- · vPvB: Does not meet the vPvB-criteria of Annex XIII of REACH (self assessment).

3 Composition/information on ingredients

- · Chemical characterization: Mixtures
- Description: Mixture of the substances listed below with nonhazardous additions.

· Dangerous components:		
CAS: 2495-37-6 Index number: 607-134-00-4	benzyl methacrylate	10-25%
CAS: 103-11-7 Index number: 607-107-00-7	2-ethylhexyl acrylate	10-25%
CAS: 13463-67-7	titanium dioxide	≥0.1-≤2.5%
CAS: 80-62-6 Index number: 607-035-00-6	methyl methacrylate	≥0.1-≤0.5%

4 First-aid measures

· Description of first aid measures

· General information:

Immediately remove any clothing soiled by the product. Take affected persons out of danger area and lay down. Involve doctor immediately.

After inhalation:

In case of unconsciousness place patient stably in side position for transportation. Take affected persons into fresh air and keep quiet.

(Contd. of page 2)

Printing date 10/09/2018

Trade name: ALT R260 Thixo (low-odor)

Reviewed on 04/25/2016

Seek medical treatment.

 After skin contact: Immediately wash with water and soap and rinse thoroughly. If skin irritation continues, consult a doctor.

- After eye contact: Rinse opened eye for several minutes under running water. Then consult a doctor.
- After swallowing: Do not induce vomiting; immediately call for medical help.
- · Information for doctor:
- Most important symptoms and effects, both acute and delayed Headache Dizziness Skin sensitization.

Irritant to skin, eyes and respiratory system.

· Indication of any immediate medical attention and special treatment needed

After inhalation, even in the absence of signs of disease, inhaled corticosteroid (eg Ventolair) give.

5 Fire-fighting measures

· Extinguishing media

- Suitable extinguishing agents: CO₂, sand, extinguishing powder, foam.
- Special hazards arising from the substance or mixture Can form explosive gas-air mixtures.
 Formation of toxic gases is possible during heating or in case of fire. In case of fire, the following can be released: Carbon monoxide (CO) Nitrogen oxides (NOx) Vapours are heavier than air. Crawling vapors can result in greater distance from the ignition!
 Advice for firefighters
- **Protective equipment:** Wear fully protective suit. Wear self-contained respiratory protective device.
- Additional information
 Cool endangered receptacles with water spray.
 Collect contaminated fire fighting water separately. It must not enter the sewage system.

6 Accidental release measures

• Personal precautions, protective equipment and emergency procedures Ensure adequate ventilation

Keep away from ignition sources

Use respiratory protective device against the effects of fumes/dust/aerosol. Wear protective equipment. Keep unprotected persons away.

- Environmental precautions: Do not allow to enter sewers/ surface or ground water. Inform respective authorities in case of seepage into water course or sewage system.
 Methods and material for containment and cleaning up:
- Do not flush with water or aqueous cleansing agents

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).

Reference to other sections
 See Section 7 for information on safe handling.
 See Section 8 for information on personal protection equipment.
 See Section 13 for disposal information.

7 Handling and storage

· Handling:

Precautions for safe handling

Cool down container when heated. Cool containers exposed to heat with water. Emergency cooling must be provided in the event of an ambient fire. Keep container tightly closed to prevent heat build up (pressure increase). Avoid heat.

Do not refill residue into storage receptacles.

Ensure good ventilation/exhaustion at the workplace.

at least 7-fold air changes per hour

Prevent formation of aerosols.

Information about protection against explosions and fires: Highly volatile, flammable constituents are released during processing. Keep ignition sources away - Do not smoke. Fumes can combine with air to form an explosive mixture. Only explosion-proof equipment. Protect against electrostatic charges. Protect from heat. Conditions for safe storage, including any incompatibilities Storage:

- Requirements to be met by storerooms and receptacles: Store only in the original receptacle. Store in a cool location.
- Information about storage in one common storage facility: Store away from oxidizing agents. Store away from foodstuffs.
- Further information about storage conditions: Store in cool, dry conditions in well sealed receptacles. Storage in a collecting room is required. Store under lock and key and with access restricted to technical experts or their assistants only. max. Storage temperature 30 ° C Keep receptacle tightly sealed. Protect from heat and direct sunlight.
 Specific and use(s) Building conting or cooling.
- · Specific end use(s) Building coating or sealing.

8 Exposure controls/personal protection

• Additional information about design of technical systems: No further data; see item 7.

- · Control parameters
- · Components with limit values that require monitoring at the workplace:

The following constituent is the only constituent of the product which has a PEL, TLV or other recommended exposure limit.

At this time, the other constituents have no known exposure limits.

80-62-6 methyl methacrylate (≥0.1-≤0.5%)

PEL Long-term value: 410 mg/m³, 100 ppm

TLV Short-term value: 410 mg/m³, 100 ppm Long-term value: 205 mg/m³, 50 ppm DSEN

• Additional information: The lists that were valid during the creation were used as basis.

- · Exposure controls
- · Personal protective equipment:
- General protective and hygienic measures:

Avoid contact with the eyes and skin. Immediately remove all soiled and contaminated clothing. Wash hands before breaks and at the end of work. Keep away from foodstuffs, beverages and feed. Do not inhale gases / fumes / aerosols.

· Breathing equipment:

Ensure good ventilation.

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use respiratory protective device that is independent of circulating air. **Protection of hands:**

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

Preventive skin protection by use of skin-protecting agents is recommended.

After use of gloves apply skin-cleaning agents and skin cosmetics.

Check protective gloves prior to each use for their proper condition.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

Our Recommendation is mainly on a one-time use as a short-term protection Liquid splashes. For other applications, you should contact a glove manufacturer.

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

• For the permanent contact in work areas without heightened risk of injury (e.g. Laboratory) gloves made of the following material are suitable:

Butyl rubber, BR

- \cdot For the permanent contact gloves made of the following materials are suitable: <code>Butyl rubber, BR</code>
- \cdot Not suitable are gloves made of the following materials: Leather gloves

10 Stability and reactivity

- · Reactivity see Section 10.2
- · Chemical stability
- Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications.
- Possibility of hazardous reactions
 Exothermic reaction.
 Reacts with peroxides and other radical forming substances.
 A hazardous polymerization may occur after the exhaustion of the inhibitor.
- Conditions to avoid Avoid heat. Avoid direct sunlight.
- Incompatible materials: Heftige Reaktionen mit Peroxiden und anderen Reduktionsmittel
- Hazardous decomposition products:

No dangerous decomposition prodocts used accordind to specifications.

 Additional information: Emergency procedures will vary depending on individual circumstances. The customer should have a contingency plan to the workplace may be present.

· Persistence and	degradability Easily biodegradable

- · Behavior in environmental systems:
- · Bioaccumulative potential May be accumulated in organism
- Mobility in soil 2-EHA: The product floats on water and does not dissolve. Adsorption on soil is not likely.
- Additional ecological information:
- · CSB-value: 2-EHA: Theoretical oxygen demand (TOD) = 5.6 g/g
- · General notes:

Water hazard class 2 (Self-assessment): hazardous for water

- Danger to drinking water if even small quantities leak into the ground.
- · Results of PBT and vPvB assessment
- · PBT: Does not meet the PBT-criteria of Annex XIII of REACH (self assessment).
- · vPvB: Does not meet the vPvB-criteria of Annex XIII of REACH (self assessment).
- Other adverse effects No further relevant information available.

13 Disposal considerations

Waste treatment methods

Hazardous waste according to Waste Catalogue (EWC). If recycling is not possible, waste must be in compliance with local regulations to be removed.

· Recommendation:

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

Uncured product residues are special waste. Cured product residues are not hazardous waste.

- · Uncleaned packagings:
- · Recommendation:

This material and its container must be disposed of as hazardous waste.

Reviewed on 04/25/2016

103-11-7	2-ethylhexyl acrylate	(Contd. of page
	titanium dioxide	
	PEG 200 DMA	
80-62-6	methyl methacrylate	
	2-(2H-benzotriazol-2-yl)-4-(1,1,3,3-tetramethylbutyl)phenol	
	C.I.Pigment black 11	
14808-60-7	Quartz (SiO2)	
20344-49-4	iron hydroxide oxide	
8002-74-2	Paraffin waxes and Hydrocarbon waxes	
	1-methoxy-2-propanol	
108-65-6	2-methoxy-1-methylethyl acetate	
128-37-0	Butylated hydroxytoluene	
	Silan, dichlordimethyl-, Reaktionsprodukte mit Siliciumdioxid	
123-86-4	n-butyl acetate	
7631-86-9	silicon dioxide, chemically prepared	
7447-41-8	lithium chloride	
1314-23-4	zirconium oxide	
67-68-5	dimethyl sulfoxide	
Proposition	65	
Chemicals	known to cause cancer:	
13463-67-7	titanium dioxide	
14808-60-7	Quartz (SiO2)	
Chemicals	known to cause reproductive toxicity for females:	
None of the	ingredients is listed.	
Chemicals	known to cause reproductive toxicity for males:	
None of the	ingredients is listed.	
Chemicals	known to cause developmental toxicity:	
None of the	ingredients is listed.	
Canceroge	nity categories

(Contd. of page 12)

· Chemical safety assessment: A Chemical Safety Assessment has not been carried out.

16 Other information

These figures relate to the product as delivered.

Sector of Use

Relevant identified uses of the mixture

SU3 Industrial uses: Uses of substances as such or in preparations at industrial sites

SU19 Building and construction work

SU22 Professional uses: Public domain (administration, education, entertainment, services, craftsmen)

Uses advised against

SU21 Consumer uses: Private households / general public / consumers

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

· Training hints

Teaching about hazards and precautions to hand the operating instructions (Technical Rule 555). Instruction must take place before the start of employment and at least annually thereafter.

Date of preparation / last revision 10/09/2018 / 11

· Abbreviations and acronyms:

RID: Règlement international concernant le transport des marchandises dangereuses par chemin de fer (Regulations Concerning the International Transport of Dangerous Goods by Rail) ICAO: International Civil Aviation Organisation

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road)

IMDG: International Maritime Code for Dangerous Goods

DOT: US Department of Transportation IATA: International Air Transport Association

ACGIH: American Conference of Governmental Industrial Hygienists

EINECS: European Inventory of Existing Commercial Chemical Substances

ELINCS: European List of Notified Chemical Substances

CAS: Chemical Abstracts Service (division of the American Chemical Society)

NFPA: National Fire Protection Association (USA)

HMIS: Hazardous Materials Identification System (USA)

VOC: Volatile Organic Compounds (USA, EU)

- LC50: Lethal concentration, 50 percent
- LD50: Lethal dose, 50 percent

PBT: Persistent, Bioaccumulative and Toxic

vPvB: very Persistent and very Bioaccumulative NIOSH: National Institute for Occupational Safety

- OSHA: Occupational Safety & Health
- TLV: Threshold Limit Value
- PEL: Permissible Exposure Limit
- PEL: Permissible Exposure Limit

REL: Recommended Exposure Limit Flam. Liq. 4: Flammable liquids – Category 4

Skin Irrit. 2: Skin corrosion/irritation – Category 2

Eye Irrit. 2A: Serious eye damage/eye irritation – Category 2A

Skin Sens. 1: Skin sensitisation – Category 1

STOT SE 3: Specific target organ toxicity (single exposure) – Category 3
